The following action is in response to the proposed amendments-after-final received March 13, 2006 and the supplemental paper received March 14, 2006. The proposed changes have been approved for entry by the examiner. Accordingly, claims 1-9 are canceled. The following action treats the merits of claim 10, as it appears in the paper filed March 14, 2006.

Allowable Subject Matter

Claim 10 is allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to show or render obvious an interleaved wet friction plate braking device as defined in claim 10; wherein, during the part of the rotation of the friction plates where the impeller blades impact the stationary fluid reservoir, the brake plates, in combination with the area between the adjacent impellers on the friction plates, define a pressure chamber so as to impart inward flow of coolant through the grooves of the friction lining as the impeller vanes pass through the coolant in the stationary reservoir; and wherein, during the remaining part of the rotation of the friction plates, coolant is permitted to flow radially outward by centrifugal force.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

The replacement sheets of drawings were received on March 13, 2006. The examiner has approved entry of the replacement sheets.

Response to Amendment

Since claims 1-9 have been canceled and since new claim 10 is allowable for the reasons set forth above, the rejections based on 35 USC112, second paragraph, 35 USC 102(b), and 35 USC 103(a) are withdrawn.
